PROJECTS

MCU-based Flood Monitoring & Warning System

- Developed an MCU-based (PIC16F877A) flood monitoring system capable of measuring water levels, indicating severity, and alerting nearby residents

Intelligent SDN-Based Network Security Solution and Formal Verification of Security Protocol

- Contributed in automating security in software-defined networks using Random Forest AI

Design and Development of a Low-Cost Portable Functional Electrical Stimulation (FES) with Touch User Interface

- Developed an affordable FES system with newly designed user-interface.

BENEDICT A. ABELLANA

A committed Computer Engineering student from the University of San Carlos with a deep passion for front-end development and embedded systems. He combines technical competence with leadership, actively participating in engineering councils and volunteer initiatives. He aims to turn challenges into learning opportunities through collaboration with mentors and colleagues.

EDUCATION

Bachelor of Science in Computer Engineering **2022 - Present**

University of San Carlos - Talamban Campus

Science, Technology, Engineering, Mathematics (STEM) **2020 - 2022**

University of San Carlos - South Campus

SKILLS

- Programming (C, C++, Python)
- Programming Embedded Systems
- Designing Printed Circuit Boards (KiCad)
- Circuit Assembly and Soldering

AFFILIATIONS

USC Computer Engineering Council **2023-2024**

- *Physical Committee*
- *CES Committee*

CODE - Computer Driven Enthusiasts **2023-2024**

- *Member*

VOLUNTEER ACTIVITIES

Jump Camp Tutor **2025**

Mobile School Volunteer **2021**

LANGUAGES

- **English**
- **Filipino**
- **Cebuano**
